

PRESS RELEASE

9th June, 2010

Enfis Tunable 40W LED Downlight/Spotlight Modules at Guangzhou Lighting Fair

Offering high-quality, tunable, efficient, LED light engines suitable for integration into smaller standard fixture sizes e.g. AR111 or AR70 and also for spotlights, the latest range of UNO Plus Products from Enfis, complete with drivers, optics and thermal management, was unveiled at Guangzhou Lighting Fair this week.

The 40W modules now come in the following versions:

- High CRI tunable: >90 CRI from <3000K - >6000K
- Warm white tunable: <1800K - >4100K
- RGBW: <3000K - >6500K + full RGB

Combining high illumination, with such a versatile, high quality output in a compact form factor, these products enable lighting designers and fixture manufacturers to create a huge range of effects and moods and for architectural, hospitality, entertainment and display applications.

Picture shows UNO Plus tunable products with AR111 optics At Guangzhou Light Fair

The new, warm white tunable version offers an unprecedented ultra-warm effect, whilst the range of driver, optic and thermal options now available makes integration quicker and lower-risk than ever.

Contact Enfis or visit us at the show this week (Hall 3.2 Booth G68) to find out more.

About Enfis – www.enfis.com

Enfis is the UK-based leader in specialist compact, high-power colour tunable LED arrays and light engines for easy integration into architectural, entertainment and medical lighting.

We also specialise in LED arrays for industrial applications such as ink and epoxy UV curing and for medical treatments.

Our expertise covers all aspects of LED array, driver and optics design. This includes LED packaging, thermal management, optics and electronic design.

We work very closely with our customers. We keep on top of all relevant new technologies in a fast changing environment, and keep ourselves and our customers ahead of the competition.

We are an ideal partner for companies wanting a fast, low-risk, cost-effective LED lighting partner for the long term. Enfis Limited operates in accordance with ISO9001:2000 and ISO13485:2003.
