

Environmental Policy

Enfis Limited recognises that our operations producing LED arrays and systems will have an effect on the local, regional and global environment. The management and employees of Enfis are committed to reducing this effect on the environment as part of our operations in the production, assembly, testing, packaging and repair of our product, and will make every effort to continually improve our environmental performance.

Enfis Limited will:

- Act in accordance with all the legal and regulatory environmental requirements applicable to our operations and act openly with government officials to ensure full compliance with such requirements.
- Use product design, development and manufacturing processes that seek to minimise any adverse effects on the environment
- Endeavour to manufacture products that are safe in their intended use, energy efficient, protective of the environment, and can be reused, recycled or disposed of safely.
- Store, handle, and dispose of all potentially hazardous substances and wastes in accordance to manufacturer's guidelines, and in a safe and proper manner.
- Strive to eliminate or reduce hazardous or nuisance releases to the air, water or land, waste discharges, and the use of hazardous materials.
- Encourage reduction, reuse and recycling of waste in all of our activities.
- Promote responsible use of resources throughout our business, including conserving energy, water and improving energy efficiency.
- Establish plans and implement related training of our employees to prevent environmental incidents and handle emergencies, or in the event that such incidents cannot be prevented, take all reasonable measures to prevent, or remedy, damage or injury which may result to the natural environment or public.
- Set realistic targets to reduce the impact made on the environment.
- This policy will be reviewed on an annual basis.
